

I am outraged that the FCC would consider overturning what is obviously the will of the majority of the people in NJ. We have voluntarily signed up for the DNC list and, as far as I am concerned, the list has actually worked very well as measured by the lack of annoying calls. Telemarketers do not have a right to invade my home. The telephone is a communication device to be used at the will of the caller, not a marketing device to be used as another point of contact. Stay out of my livingroom. Bad enough that radio stations have become an assault on the intellectual capacity of this country through your meddling w/ the competitive landscape.

Do NOT overturn the DNC list provisions in the state of NJ.
